

PRESS RELEASE

HEDNO's Network Major Installations Department has received a three-fold certification for quality, environmental management, safety and health by Bureau Veritas.

The certification refers to the Athens Service Team for Transformers Repair in which works for maintenance and repair of all transformers types up to 150kV, construction and repair of relative coils, winding in motors and generators, as well as processing of insulating oils are conducted.

In the fully organized and equipped chemistry laboratory of the installations, physicochemical analysis and insulating oils measurements are realized.

ISO 9001:2008 (Quality Management System) certifies Corporation's commitment for continuous improvement of quality.

ISO 14001:2004 (Environmental Management System) certification underlines HEDNO's environmental awareness and efforts undertaken for the reduction of the consequences caused by its activities to the environment.

OHSAS 18001:2007 (Occupational Health & Safety Management System) assures HEDNO's strategic choice to protect with the best possible way its manpower and to apply effective ways to limit risks in the work environment.
