

**ANNOUNCEMENT**

Following previous announcements concerning possible power interruptions due to fault that occurred in PPC's Autonomous Power Generation Plant in Rhodes, HEDNO would like to inform consumers that, although it has not been necessary until today to proceed to power interruptions by turns of limited duration, is standing by so as to apply the attached [indicative schedule](#) for today, Tuesday 17.2.2015, in case of reduced available capacity between 18:30 and 21:30 with estimated duration of 30 minutes per scheduled region group.

HEDNO would like to express once more its gratitude to consumers for their active participation in the effort to avoid exceptional power interruptions and invites them to continue this effort by limiting electricity consumption to the minimum necessary (especially between 18:30 and 21:30).
