

**COMMUNICATION**

Today, Friday, July 1st, at approximately 13:00 hs there has been a global power cut on the islands of Folegandros and Sikinos as a result of a fault due to an unforeseen event occurred at the Ios - Sikinos submarine interconnection line.

HEDNO's specialized crews took immediate action by getting to the marine region in order to identify and repair the fault in the submarine interconnection line.

In the meantime and until the fault in the submarine connection got repaired, a request was submitted to PCC (DEI S.A.) for assistance. – PCC immediately granted our request – to transfer generating sets to both islands in order to restore power supply within the shortest possible time frame.

HEDNO would like to express its sympathy towards its consumers for the inconvenience and thank them in advance for their understanding; its crews make all possible efforts to reduce such inconvenience to the minimum.
