

Announcement

HEDNO would like to inform consumers that, due to the reduction of the available electricity capacity in **Crete**, caused by the strikes of the General Federation of Power Industry Personnel (GFPIP/PCC), together with the lack of wind that has led to a resetting of the generated wind power, power outages may be used alternatively on Monday 23 April 2018 between 20:00 and 21:30, with an estimated duration of one hour per region and in order to secure smooth operation for the island's electricity network.

HEDNO would like to apologize for any inconvenience caused and thank its consumers in advance for their active participation in the effort to reduce electricity consumption.

Athens, Monday 23 April 2018
