

ANNOUNCEMENT

The Hellenic Electricity Distribution Network Operator (HEDNO) with the opportunity of the beginning of the hunting period ([Greek Government Gazette 1670/B/10-08-2015](#)) which will last until the 29th of February 2016, draws the attention to hunters not to shoot when their bird games are on or near electrified Networks (conductors, cables, poles, substations, insulators, etc.) since there is danger of serious accidents, injuries, fire, fault on the power supply Network etc.

It is reminded that people responsible for an accident caused by the above mentioned situations are prosecuted by the Law.

At the same time, taking into consideration the citizens' safety, HEDNO recommends that when a citizen notices a damage on the power supply Network (fall of cables, conductors etc.) that it might be caused by the above mentioned situations or by other causes, he should inform immediately the faults office of HEDNO's local unit, prevent the intervention of third parties and keep all citizens away from this point.

Athens, 25th of August 2015
