

PRESS RELEASE

Clarifications about the power supply failure on the island of Hydra

HEDNO would like to clarify that as regards the total power supply failure on the island of Hydra, today, Sunday 26 August 2018, it continues its efforts for the fastest possible re-electrification of the island.

Immediately following the power supply failure, HEDNO inspected the Network from Kranidi Substation up to Thermesia (total length of about 25 km) and its crews inspected under very difficult conditions -as no vehicle is allowed- the Hydra Network.

Furthermore, measures have been taken to transfer generating sets to re-electrify the island if the restoration of the fault is proven time-consuming.

HEDNO would like to apologize for the inconvenience caused to the consumers and assure them that it makes all possible efforts to reduce such inconvenience.
